---

## Professional Summary

Mid-level full stack developer with 3 years of hands-on experience building scalable, user-centric web applications using TypeScript, React, Next.js, and Node.js. Skilled in designing RESTful APIs and microservices with experience in FinTech/Banking, data collection and management, business-client products and communication technologies. Fast learner with a strong grasp of modern development workflows, state management, and UI frameworks while following best practices. Passionate about clean architecture, developer experience, and building intuitive frontend experiences.

---

## Technical Skills

- **Languages & Frameworks:** JavaScript, Typescript, React, Next.js, Node.js, Express, Nest.js, MERN
  - **Styling & UI:** Tailwind CSS, styled-components, Prime React, Bootstrap, DaisyUI
  - **State Management:** Redux, redux-persist, SWR
  - **Databases:** PostgreSQL, MySQL, MongoDB, GraphQL, ORMs (Prisma, Mongoose, Sequelize, Apollo)
  - **Tools:** Docker, Git, Postman, Swagger, DBeaver
  - **Services:** REST APIs, Microservices, Eureka, GraphQL, Web sockets
- 

## Professional Experience

### Full Stack Developer

*Warpspeed Financials Limited*

Dates: February 2024

- Developed a frontend dashboard, integrating it with a reports API for visibility and monitoring of end to end financial activity, dispute resolution, account statements, reconciliation and auditing
- Implemented role-based access control for frontend dashboard service to ensure data protection and data restriction.
- Implemented secure server-side requests for authorizations and client-side secure cookie storage for credentials.
- Designed responsive, dynamic user interfaces using Next.js and Tailwind CSS with custom scrollbars, animated card transitions as well as theme selection and detection.

- Developed a template for Prime React Data Tables with dynamic headers, custom column rendering, and Tailwind styling which includes column sorting, row selections and custom data rendering.
- Facilitated database migrations from MongoDB to MySQL.
- Built an API microservice for value added services using Nest.js. Service features purchase/payment of airtime, mobile data, cable TV and electricity; safe re-queries and settlements for long lasting or pending transactions.
- Led a team of developers to create a custom Nest.js application to manage and track activity of field staff. Service featured monitoring of staff productivity, places visited via check-ins, revenue generation, daily wages automation based of productivity and dynamic metrics.
- Developed a custom-made team collaboration tool to automate stand-ups and team reporting, utilizing GraphQL and sockets for real-time communication. Application was integrated into a shared Slack workspace.

### **Associate Software Developer**

*Decagon*

Dates: June 2023 – Dec 2023

- Led the development team in building a prototype wallet system for savings and bill settlements.
- Developed a simple blog site for in house developers to share views and learnings, including simple interest and trend-based content.
- Completed Agile training under certified SCRUM masters and integrated the Agile system in developing and prototyping products.

---

### **Education**

**B.Eng,** Mechanical Engineering

University of Debrecen, Hungary

Dates: 2014-2021

---

### **Certifications**

Software Development

SCRUM fundamentals certificate

Web Design

---
