PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of expertise building production-grade web applications using TypeScript across frontend and backend. Experienced delivering fintech, real-time communication, healthcare, logistics and enterprise solutions from architecture through deployment. Skilled in React, Next.js, Node.js, NestJS, REST, GraphQL, AWS deployments, Docker, Redis, SQL/NoSQL databases, authentication, and AI-assisted development workflows.

CORE SKILLS

- Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Material UI, PrimeReact, shadcn/ui, Styled Components, Framer Motion
- State Management: Redux, Redux Toolkit, Zustand, SWR, TanStack Query, React Hook Form, Zod
- Backend: Node.js, NestJS, Express, GraphQL, REST APIs, WebSockets, JWT/Passport, class-validator, Microservices
- Databases & ORM: MongoDB, MySQL, PostgreSQL, Prisma, Sequelize, Mongoose, Redis
- DevOps & Infrastructure: AWS (EC2, S3), Docker, Git, nginx, systemd, deployment workflows
- Data Visualization & Maps: Recharts, Chart.js, Google Maps, OpenStreetMap, Leaflet
- Methodologies: Agile, Scrum, Swagger/OpenAPI, RBAC, AI-assisted Development

PROFESSIONAL EXPERIENCE

Full Stack Developer

Warpspeed Financials Limited

February 2024 – Present

- Built production fintech systems across React/Next.js frontends and NestJS/Express backends
- Designed REST and GraphQL APIs for payments, reporting and real-time collaboration
- Implemented RBAC, authentication and transaction workflows with JWT/Passport
- Developed dashboards with reporting APIs for financial activity monitoring, dispute resolution, reconciliation and auditing
- Built a real-time chatting platform microservice using GraphQL and WebSockets, integrated into a shared Slack workspace
- Led development of a field staff management application with productivity tracking, check-ins, daily wages automation and dynamic metrics
- Facilitated database migrations from MongoDB to MySQL and worked with PostgreSQL and Redis
- Used Docker and contributed to deployment workflows; performed code reviews across engineering teams

Full Stack Developer (Contract)

Healthcare Campaign Platform

2024

- Designed and built a full-stack vaccination-campaign management platform (NestJS/Prisma backend, Next.js/React frontend) with 94 endpoints, 23 database models and 20 controllers
- Architected an offline-first sync engine using staging entry tables and a commit-flag dependency graph, promoting records through atomic transactions with foreign-key remapping
- Built interactive analytics dashboards (Recharts) for vaccination coverage, LGA/ward distribution and dose administration trends, plus an interactive Leaflet map with coverage-based markers
- Implemented three-tier RBAC (Agent/Supervisor/Admin) with JWT/Passport authentication across separate web and mobile auth flows
- Built full agent/supervisor lifecycle management (creation, decommissioning with successor handoff, reactivation, location reassignment)

- Provisioned and deployed staging environment on AWS EC2 (nginx, systemd); authored deployment runbook and Prisma migration workflow
- Authored technical design documentation and generated full Swagger/OpenAPI documentation across all 94 endpoints

Frontend Developer (Contract)

Logistics Platform (Loopfreight)

2024 – 2025

- Built an end-to-end driver rewards system (leaderboard, monthly recognitions, campaign management) across a layered API architecture
- Stood up webhook management data layer and a paginated admin UI for configuring and updating webhook endpoints
- Introduced a platform-wide Manager role, auditing and updating ~20 role-gated pages for RBAC consistency
- Diagnosed and fixed UX defects including partner-booked ride blocking, replacing with dismissible banner and time-based staleness rules
- Authored project conventions documentation codifying API-domain architecture and styling standards

Frontend Developer (Contract)

Fleet Management & Tracking Platform

2025

- Implemented live GPS asset tracking (30-second polling) with Google Maps-based fleet view and color-coded online/offline status indicators
- Built geo-fencing with Google Places autocomplete and configurable breach actions, plus remote shutdown/unlock operations with admin/subscription gating
- Developed dual payment flows (payment gateway and wallet) and admin subscription management including plan CRUD, billing cycles and feature toggles
- Built a financial overview dashboard, wallet operations panel and standardised data tables across the admin portal
- Integrated Google SSO with role-based access control gating admin routes and remote operations

Associate Software Developer

Decagon

June 2023 – December 2023

- Developed React and Node.js applications in Agile teams under certified Scrum masters
- Led development of a prototype wallet system for savings and bill settlements
- Completed Agile training and integrated the Agile methodology in developing and prototyping products

EDUCATION

B.Eng, Mechanical Engineering

University of Debrecen, Hungary

2014 – 2021

CERTIFICATIONS

- Software Development
- SCRUM Fundamentals Certificate
- Web Design
